

CS 253: Data Structures and Algorithms

Randomized Final Study Problem

Sequence-Based Structures

Skip List Tracing Challenge

Construct a skip list by inserting the keys in [66, 36, 56, 58, 90, 27, 51, 75, 94, 91]. Use the prescribed tower heights in the table below to remove coin-flip ambiguity. After the structure is built, remove the keys in [36, 75, 91], showing each pointer update.

Key	66	36	56	58	90	27	51	75	94	91
Height	1	1	5	1	1	1	3	1	1	1

Instructor Reference

Promotions above the base level: 6. Final skip list after the deletions:
